

OMAR NOUIRI

AI Consultant | Generative AI & Cloud Solutions | NLP & LLM Expert

omar.nouiri98@gmail.com | +212 6 20 21 79 30 | Tangier, Morocco | Open to relocation: Luxembourg

French: DALF C1 | English: Professional | Arabic: Native

PROFESSIONAL SUMMARY

AI Consultant and Senior Data Scientist with 4+ years delivering generative AI and NLP solutions for enterprise clients in banking, insurance, and fintech. Deep hands-on expertise in LLM integration, RAG architectures, prompt engineering, and intelligent automation on AWS and GCP. Experienced translating complex business requirements into production AI systems within cross-functional project teams. Native Arabic speaker with DALF C1 French and professional English — fully equipped for multilingual consulting environments in Luxembourg.

CORE COMPETENCIES

Generative AI | LLM Integration (GPT, LLaMA, Claude) | Prompt Engineering | RAG Architecture | Intelligent Automation

NLP & Conversational AI | Cloud Solutions (AWS, GCP) | MLOps | Data Pipeline Design | Client Advisory

CONSULTING & PROJECT EXPERIENCE

Data Scientist / AI Consultant | DXC Technology | Rabat, Morocco (Hybrid) *Jan 2024 – Present*

- Consulted on generative AI strategy for enterprise insurance clients, identifying and deploying LLM-based use cases that improved decision-making workflows and customer interaction quality
- Architected and optimized a production RAG system with hybrid search, reranking, and prompt engineering — reducing response time by 10 seconds and improving output accuracy by 20%
- Designed agentic AI workflows and delivered POCs translating client business requirements into scalable cloud-based automation solutions on AWS
- Built intelligent document processing features using LLMs: image and graph extraction, Excel parsing, and semantic embedding pipelines
- Conducted applied research on frontier LLM techniques (GPT-4, open-source models), advising stakeholders on adoption and integration strategies

Data Scientist — AI & NLP Projects | Digital Place | Tangier, Morocco (On-site) *Oct 2021 – Dec 2023*

- Won fintech challenge by designing and delivering a Darija-dialect conversational banking assistant using RASA and custom NLP models — demonstrated to clients at GITEX
- Deployed French and Arabic NLP transcription models achieving 95% accuracy, integrated into a banking app serving 10,000+ active users
- Built Airflow-based ETL pipelines processing 500,000+ records; applied BERT, GPT, and LLaMA for classification, skill extraction, and semantic recommendations
- Trained end-clients on AI solutions and created automated PowerBI dashboards for executive reporting

Data Engineer Intern | Digital Place | Tangier, Morocco (On-site) *Mar 2021 – Sep 2021*

- Built automated scraping and processing pipelines covering 100,000+ Moroccan job listings
- Designed MySQL schema for structured storage and insight extraction at scale

KEY PROJECT DELIVERABLES

RAG-Based Insurance AI Assistant — DXC Technology | 2024–2025

End-to-end LLM solution on AWS for insurance document Q&A. Applied hybrid retrieval, reranking, and prompt optimization. Delivered measurable accuracy and latency improvements for enterprise client.

Darija Conversational Banking Assistant — Fintech Catalyst | 2023

Fine-tuned Meta Wav2Vec on Darija dialect; built action-based RASA assistant. Won national fintech challenge. Presented client-facing at GITEX.

Job Market Intelligence Platform (Prodige / Mouakaba) | 2022

Automated pipelines scraping and classifying 500K+ job postings using transformer models; delivered PowerBI dashboards for labor market insights.

AI-Enhanced Startup Search Engine | 2022

Fine-tuned attention-based RNN to generate semantic keywords from startup descriptions, improving search relevance and recommendation quality.

TECHNICAL SKILLS

Generative AI & LLMs: GPT-4, LLaMA, Claude, Mistral, LangChain, RAG, Prompt Engineering, Agentic Workflows

Cloud & Infrastructure: AWS (Lambda, S3), GCP, Docker, Apache Airflow, Git, GitHub, Bitbucket CI/CD

ML / DL Frameworks: PyTorch, TensorFlow, Keras, Scikit-Learn, Hugging Face Transformers, spaCy, NLTK, RASA

NLP: Text Classification, NER, Sentiment Analysis, Summarization, Translation, Seq2Seq, Language Modeling

Databases: MySQL, PostgreSQL, MongoDB, SQLite, Neo4j

BI & Visualization: PowerBI, Tableau, QlikView

Languages: Python, JavaScript, SQL

EDUCATION

State Engineer Diploma (MSc) — Computer Engineering, Information Systems | University of Abdelmalek Essaadi — ENSA | Tangier, Morocco 2021

Baccalaureate — Mathematical Sciences (Option B) | AL Amana Institute | Tangier, Morocco 2015

LANGUAGES

French: Professional Proficiency — DALF C1 | **English:** Professional Proficiency | **Arabic:** Native
